

Communication

Date	30 September 2026
Team ID	SWTID-2026-7960
Project Name	Import Data using Transform Maps (Spreadsheet) in ServiceNow
Maximum Marks	1 Mark

Communication Plan

Effective communication is essential for successfully completing the ServiceNow project. The team communicates regularly to share progress, discuss issues, coordinate tasks, and review the project before the final demonstration.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp / In-person Discussion	Parvathi P, Yuvasri T, Manjula K, Kalaiyarasi K, Jayalakshmi S	To discuss daily tasks, progress, and pending work.
2	Progress Update	Weekly	WhatsApp / Google Meet	All Team Members	To share the completed modules and track overall project progress.
3	Issue / Bug Discussion	As Needed	WhatsApp / In-person Discussion	Relevant Team Members	To discuss ServiceNow configuration issues, import errors, transform issues, and duplicate record problems.
4	Stakeholder Review	Bi-Weekly	Google Meet / In-person	Team Members and Mentor	To review project progress, receive feedback, and make required improvements.
5	Final Demo Rehearsal	Once	In-person / Screen Sharing	All Team Members	To practice the complete project demonstration and ensure all modules work correctly.
6	Documentation Review	As Needed	Google Docs / WhatsApp	All Team Members	To review and finalize project documentation, screenshots, and presentation content.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Difficulty in coordinating team members for project discussions.	Regular communication through WhatsApp and scheduled discussions was used to coordinate tasks.
2	Issues occurred while importing Excel data and mapping fields using Transform Maps.	The team checked the Import Set, field mappings, and Transform Map configuration and corrected the required settings.
3	Duplicate records appeared when the same employee data was imported again.	Coalesce was enabled using the Employee ID field to identify existing records and prevent duplicate entries.
4	Difficulty in preparing reports and adding them to the dashboard.	The report configuration and dashboard settings were reviewed and tested before the final demonstration.
5	Team members had different tasks and progress levels.	Tasks were divided among team members and regular progress updates were shared to complete the project on time.
